

## Think Easy-On Dark Fabric Transfer Paper For Black Or Dark Coloured Textiles.

For use with all home inkjet printers, suitable for transferring black and white or colour image onto black or dark cotton, using an iron.

### What you will need:

- a) Dark fabric transfer paper
- b) Inkjet printer
- c) A flat, hard, smooth surface to iron on
- d) An iron, (not a travel iron)
- e) Greaseproof paper, (1 sheet provided for every 5 sheets of Dark Fabric Transfer Paper)
- f) Black or dark T-shirt, baseball cap, boxer shorts, cloth covered mouse mat, cotton napkins or handkerchief, etc.

### Printing:

Store Dark Fabric Transfer Paper in its original packaging in a cool dry place.

Only print onto unprinted, coated side of the transfer film. Select normal mode and not 'mirror mode' on your printer. Use single sheet feeding only.

Print the desired motif onto normal copy paper to check that the colour and size are correct.

Printer settings: Normal paper mode and best print quality, (highest DPI setting).

Before transferring, leave the printed image to dry for approx 5 minutes. Cut out the motif without leaving a margin around the edges. Peel the transfer film off of the base paper.

### Transferring:

Preheat the iron to the highest possible temperature, (this takes approx 2 mins)

Do not use steam function.

You can also use a transfer heat press.

Briefly iron the fabric to ensure that it is completely smooth.

Place the transfer film onto the textile with the printed image facing upwards.

Iron the transfer film applying very little pressure. Warm up the transfer evenly with slow circular movements from edge to edge, making sure that heat is applied evenly over the entire area. Don't forget the corners and edges.

Iron for a maximum of 4 mins for an A4 sized motif. For smaller motifs iron for less time.

Allow transfer to cool for at least 1 minute, then peel off the greaseproof paper in a smooth, even movement.

It is possible to use the same greaseproof paper several times, as long as no ink has transferred onto it from the prints.

### Washing:

Wait 24 hours after applying the transfer before washing.

Fabrics bearing our transfers are machine washable up to 30°.

Always wash garments inside out.

Do not use strong detergents or bleach.

Do not tumble dry.

Iron only on reverse side.

To revitalise colour brilliance, the transfer can be ironed again. Cover the picture with greaseproof paper, iron for a few seconds and peel the greaseproof paper off after cooling.

Peel the greaseproof paper off while it is still hot.
